Kodak Clean'N'Clear
Anti-Reflective Coating

**Clear QUALITY,
EASIER TO CLEAN
AND STAYS CLEAN.**

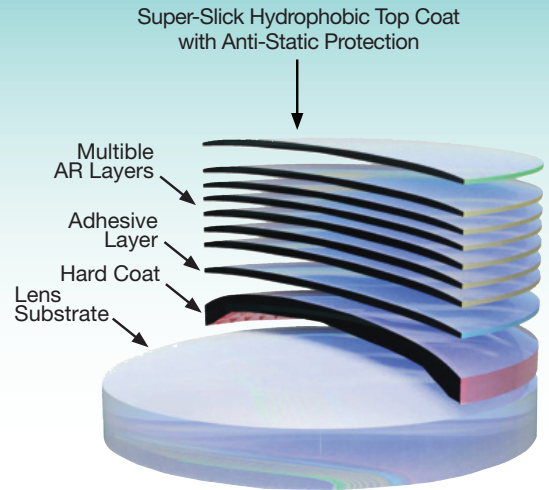

KODAK Clean'N'Clear™ Coating eliminates unsightly glare and the added anti-static properties repel clingy dust.

The super-slick hydrophobic top layer seals the lens and repels water and dust, making it easier to clean.

Your patient will enjoy reduced lens reflections for more comfortable and safe night driving. During the day, the anti-reflective coating helps reduce eye strain and fatigue by enhancing visual clarity.

How do the multiple layers work?

KODAK Clean'N'Clear Coating has several microscopic layers of minerals applied to both sides of the lens to effectively reduce reflections over a broad band of wavelengths. The protective layers provide durability to help resist scratches, dirt and smudges.
