The most trusted name in Suncare for your skin now means sun protection for your eyes.
Coppertone lenses block 100% of UV rays, the same rays that may contribute to premature skin aging caused by sunlight.
100% UV Protection is no longer enough.

Coppertone lenses go beyond UV protection to guard against harmful high energy visible (HEV) light.
Coppertone polarized lenses eliminate 97% or more of reflected glare.
The Skin Cancer Foundation recommends this product as an effective UV filter for the eyes and surrounding skin.

In addition, Coppertone lenses meet AOA specifications for blockage of UVA and UVB rays.
Scratch Resistance
Made from high quality optical grade polycarbonate resin, Coppertone lenses are 4x more scratch resistant than ordinary lenses.

Impact Resistance
Coppertone lenses provide up to 10x the impact resistance of ordinary sun lenses and are virtually unbreakable.
## Industry Leaders Choose Coppertone

Eliminates 97% or more of reflected glare  
Provides 100% UV protection  
Lightweight lenses  
Superior impact resistant lenses  
Scratch resistant lenses  
Provides added protection against HEV light  
Skin Cancer Foundation Seal of Approval
